Now, I will present the overview of the first-quarter financial results for the fiscal year ending March 31, 2019.

Our total ASK growth rate was 5% year-on-year in this quarter due to capacity expansion mainly in international routes. Together with strong demand in international passenger and the capacity expansion, operating revenue reached to 342.1 billion yen, increased by 27.2 billion, up 8.7% year-on-year.

Operating expense increased by 27.1 billion yen year-on-year because of the fuel price increase and the new IT system related cost increase. However, the cost increase was outweighed by the revenue increase. Operating profit was 24.9 billion, increased by 0.1 billion, up 0.7% year-on-year. Operating profit margin was 7.3%.

Net profit declined to 17.5 billion yen, down 10.3% year-on-year, due to the increased loss on sales and disposal of flight equipment.

As disclosed through our press release today, a preparatory company of our new international mid and long-haul low-cost carrier has been established. We will accelerate its preparation for its launch in 2020.

Now, I will explain about the changes in operating profit.

Revenues from International Passenger increased by 19.2 billion yen because of passenger carriage increase due to the capacity growth and optimization of cabin configurations as well as the increase in fuel surcharge.

Revenues from Domestic Passenger increased by 1.1 billion yen as a result of the increase demand of individual passengers.

Revenues from cargo leaped by 3.1 billion year-on-year. This was achieved through strong traffic of international cargo, price increase and fuel surcharge revenue increase.

For expenses, fuel cost increased by 10 billion yen due to the market rise and the passenger system related cost increased by 4 billion yen. Other costs remained to increase at the same rate as our capacity or demand increased.

*FSC=Fuel Surcharge

+ stands for profit increase (revenue increase, cost reduction)
▲ stands for profit decrease (revenue decrease, cost increase)
This page explains changes in operating profit from the viewpoints of market impact and others.

The market impact on profit was limited to the decrease of 0.9 billion yen year-on-year. Despite the fuel cost increase due to the higher fuel prices, the increase of fuel surcharge revenue and hedging have offset most of the fuel cost increase.

Apart from Market impact, operating profit rose by 1.1 billion yen year-on-year, because the revenue increase outpaced the cost increase in conjunction with the capacity expansion.

#### Change in Revenue

- **Total Change:** +19.2Bn (+18.2%)
- **1st Quarter Mar/18:** 105.5
- **1st Quarter Mar/19:** 124.8

**Factors of changes in Revenue per Passenger (estimate):**
- **+2%** Change of settlement adjustment method for domestic sectors on international itineraries (+1.4Bn)
- **+1%** Fuel Surcharge (+)
- **+4%** Net Unit Price (+)
- **+7%** Demand Mix (+)
- **0%** Route Effect (+)
- **+0%** Demand Mix (+)

---

1. The effect of the change of the settlement adjustment method for domestic sectors on international itineraries is excluded in the figures in parentheses.
2. Revenue per Passenger = Passenger Revenue / Passengers
3. Yield = Passenger Revenue / RPK
4. Unit Revenue= Passenger Revenue / ASK

---

*JAPAN AIRLINES*
For International routes, the number of passenger increased by 10.5% year on year as a result of both outbound and inbound demand.

The revenue per passenger rose by 7.0%. The graph on the right bottom shows the analysis of the changes. The net unit price increased by 2% with the improved yield management with the new IT system. Besides, fuel surcharge of 5.1 billion yen and the settlement adjustment of 1.4 billion yen were also included.

As a result, international passenger revenue stood at 124.8 billion yen, up 18.2% from the year before.

1. The effect of the change of the settlement adjustment method for domestic sectors on international itineraries is excluded in the figures in parentheses
2. Revenue per Passenger = Passenger Revenue / Passengers
3. Yield = Passenger Revenue / RPK
4. Unit Revenue = Passenger Revenue / ASK

#### Change in Revenue

- **+1.1Bn (+1.0%)**
  - Increase in individual passengers (+)
  - Change of settlement adjustment method for domestic sectors on international itineraries (▲1.4Bn)
  - Competition with other airlines (▲)
  - Increased demand for promotional fares (▲)

---

1  The effect of the change of the settlement adjustment method for domestic sectors on international itineraries is excluded in the figures in parentheses
2  Revenue per Passenger = Passenger Revenue / Passengers
3  Yield = Passenger Revenue / RPK
4  Unit Revenue= Passenger Revenue / ASK
Next, for domestic routes.

The number of passengers increased by 2.8% as a result of increased demand of individual passengers.

For the revenue per passenger, it appeared to have declined by 1.8%. However, without the deduction of 1.4 billion settlement adjustment, it should have remained nearly at the same level of the year before or a slight decrease of 0.6% despite of the competition with another airline on certain routes.

The growth of promotional fares is continuing to outpace that of high-yield fares. It appears to decrease the revenue per passenger, however, it brings more revenue in addition to the revenue increase with the expanded capacity.

The capacity expansion was moderate and the load factor increased. The passenger revenue reached 117.2 billion yen, up 1% year-on-year.

2. Services = Expenses regarding inflight services, airport lounges, cargo equipment, etc.
3. Includes Passenger Service System related expenses (+4.0Bn)
Now, I will explain the major operating expense items, which totaled to 317.1 billion yen, up 9.3% year-on-year.

Without the increase of fuel expense and 4 billion yen of the new system related expenses, the rate of the increase of the remaining expenses was about 5% year-on-year, which was the same as our capacity or demand increased. The 4 billion yen increase of the new IT system is included in the 8.7 billion yen increase in Others expense.

The total operating expenses remained almost as planned. We will continue to control our cost.

I will explain the impact of Fuel and FX Markets.

The top left graph shows the transition of factors in fuel cost. The top right graph shows the ratio of hedged fuel costs as of the end of June. For this year, nearly 40% of the total fuel costs have been already hedged, which is equivalent to the fuel amount used by domestic routes, in which no fuel surcharge is collected. The same policy will be applied to the next year or later.

Our hedging policy gradually increases hedging over maximum three years. Having said so, the recent fuel price hike has limited effects on the hedged prices for the following years.

The right bottom chart shows the impact on the profit of the second quarter or later. The fuel surcharge for August and September has already been fixed. Based on that, the profit impact is estimated. If FX goes at 115 yen as our plan and the fuel price continues to be at the current level, the impact on the profit of the full year will be around 4 billion yen, which can be recovered by revenue increase or expense deduction.
## Major Balance Sheet Items and Cash Flow Items

- Growth Investment (8) 150.0
- Replacement investments (9) 87.0

6. Growth investments = i.e., Introduction of aircraft that will contribute route expansion, flight frequency increase, or operational efficiency improvement, Improvement of quality, service or efficiency, or Development of new business domains.
7. Replacement investments = i.e., Replacement of existing old facilities or for compliance to laws and regulations.

※No change from the figures disclosed on April 27, 2018.
INTENTIONALLY LEFT BLANK
Holding capital investments within the amount of operating cash flow, we will actively invest approximately 2/3 of the total investments for growth to increase corporate value.

**FY2018~2020 Capital Investments**

**Total 660 bn yen**

- **Replacement investments**
  - 220 bn yen

- **Growth investments**
  - 440 bn yen
  - Generate new cash flow
  - Investments to achieve extraordinary growth

**Aircraft**

1. **Growth investments**
   - Introduce aircraft that will contribute to route expansion, flight frequency increase, or operational efficiency improvement.

2. **Renewal investments**
   - Replace old regional prop aircraft, aircraft parts, or etc.

**Ground • IT, etc.**

3. **Growth investments**
   - Improve quality, service or efficiency. Develop new business domains, etc.

4. **Replacement investments**
   - Replacement of existing old facilities or for compliance to laws and regulations, etc.

**Strategic growth investment line 50 bn yen**

- **Ground • IT, etc.**
  - 210 bn yen

- **Aircraft**
  - 450 bn yen

※Originally disclosed on February 28, 2018
We will strategically allocate capital to increase corporate value, while maintaining a firm financial structure as well as high capital efficiency at the same time.

**Capital Allocation**

1. Maintain approx. 2.6 months’ worth of revenue as standard cash on hand required for stable management and recognize the excess amount as additionally allocatable capital.
2. Actively promote further growth investments and create maximum free cash flows.
3. Utilize interest-bearing debt for growth investments and improve capital efficiency.
4. Strategically allocate additional capital.

**FY2018～2020 Additionally Allocatable Capital**

- Improve the corporate pension fund financially
  - Consider approx. 80 bn yen injection ahead of schedule

- Investments to achieve extraordinary growth
  - Set a 50 bn yen strategic growth investment line

- Further increase shareholder returns
  - Pay stable and highly predictable amounts of dividends, taking into account DOE (Dividend on Equity Ratio)\(^3\) in addition to the payout ratio
  - Consider and execute share repurchase in a timely manner

*1 Free cash flow (3-year aggregate) = Cash flow from operating activities - Cash flow from investing activities
*2 3-year aggregate new debts used (new procurements - repayment of new procurements)
*3 Indicates dividend yield of shareholders’ equity

DOE (Dividend on Equity Ratio) = Total Dividend ÷ Equity

- 1
  - Approx. 2.6 months’ worth of cash on hand required for stable management

300
Maintain both strong financial structure and high capital efficiency, and aim for corporate value increase

**Financial structure**
- **Shareholders' equity ratio**: Equity ratio reached approx. 60%. Having built strong financial structure, we will work to maintain the current level.

**Credit rating**: Aim to achieve and maintain "A flat" or above credit rating by improving cash flows and securing fruits from our growth strategies.

**Capital efficiency**
- **Decrease cost of capital • Utilize debt**: Decrease cost of equity through comprehensive information disclosure, IR, etc. Utilize debt with discipline based on adequate debt repaying capacity with sufficient cash flow from operating activities.

- **Liquidity**: Based on our current scale of business operations, standard liquidity on hand is set at approximately 2.6 month's worth of revenue (currently approx. 300 bn yen) for sufficient event risk tolerance as well as return on assets (ROA).

Further increase our corporate value by decreasing cost of capital, and implement our shareholders return initiatives.

**Shareholders return**

**Policy of shareholders return**
- **Dividend**: Stable and more predictable dividends are aimed. Dividend on equity (DOE) in addition to the payout ratio has been adopted as a reference. Increasing the payout ratio to maintain dividend levels, after the effective tax rate increase, will be considered.

- **Share repurchase**: Share repurchase in a timely manner, based on 1) an appropriate level of cash and deposits, 2) the future growth investment, 3) free cash flow outlook or 4) stock price, will be considered.
Achieve 1% of the additional revenue in international and domestic passenger in FY18 and the benefit will exceed the cost to contribute to our profitability from FY19.

System configuration conceptual diagram

- Self-operated System
- JAL spec
- A spec
- B spec
- Amadeus (Altea)
- New Fusion

System transformation in NOV 2017
- Reservation & ticketing system (international and domestic flights)
- Boarding system (international flights)

System transformation in 4th Q 2018
- Boarding system (domestic flights)
  - Smoother connections from domestic to international flights
  - Improved operation efficiency with the integrated system

Profitability Improvement

- Improve cost efficiency
- Revenue Increase
- System operating expense
- Depreciation

Total Investment: 80 bn JPY

Refined revenue management
Enhanced functions for inbound demand
Easy adjustment for new services

- More precise and advanced revenue management
  - Maximized revenue through optimal seat control by itinerary
  - The integrated system for both domestic and international flights for more connecting customers to/from domestic flights
  - Improved seat control and yield control functions

The improved overseas websites

- The industry-wide standard functions will improve compatibility with other airlines
- The maintenance and management cost reduction

Future initiatives using the new system

- Improved pricing, new mileage measures, and new products and services
ESG

Environmental

Low-Carbon Initiatives:
- Introduce fuel-efficient aircraft and aim for eco-friendly operation
- Continue atmospheric observations:
  Over 30 years of atmospheric observations with aircraft (gathered data available to the public)

Social

- Further promote workstyle innovation:
  Reduce overtime
- Diversity promotion initiatives:
  Aim for 20% females in managerial positions by the end of FY23
- Contribute to regional revitalization through tourism promotion

Governance

- High transparency and strict management oversight:
  - 3 Independent External Directors with extensive management experience
  - 3 Independent External Auditors with legal and accounting expertise
  - Voluntarily set up various committees, in which the majority of members of each committee are External Directors and the committee is chaired by an External Director
- Evaluate the effectiveness of the Board of Directors using a third party organization

Board of Directors

3 External Directors out of ten Directors (30%)

Establishment of Various Committees

Corporate Governance Committee
Nominating Committee
Compensation Committee
Personnel Committee
Officers Disciplinary Committee

- The members are publicly announced.
- Chairpersons are all External Directors excluding the Personnel Committee, which supervises personnel affairs of Executive Officers.
